

Empowering Collaboration and Information Security

Government Mobile Solutions Hotsheet

Fujitsu has played an integral role in streamlining government IT processes for more than 40 years. Our services enable critical functions of government at national, local, regional and devolved levels, touching the lives of millions of private citizens and public employees every day. We see ourselves as public service partners, proud of our record and determined to drive the evolution of the very best services, technology has to offer for the entire community.

Our proven commitment to the public sector is deep and long-term. We believe in the continuous pursuit of innovation for public services to provide greater value and higher responsiveness to citizens' needs. Wisely spent public dollars mean a stronger, more competitive economy. To this end, Fujitsu has committed significant resources as well as the very best technically skilled personnel. From local police forces to national security agencies, Fujitsu has worked with government organizations of all sizes. Our solutions can help governments streamline operations, improve services and save money. Why compromise?

Thanks to Fujitsu technology:

- Federal and local government organizations are always connected, whenever, wherever resulting in streamlined collaboration and higher productivity
- Fujitsu client computing devices provide the best-in-class ruggedized mobile computing solutions for First Responders and Public Safety personnel
- Fujitsu client computing devices provide the reliability and durability demanded by mobile office environments
- Security and manageability features protect critical and sensitive data
