

Webroot's interactive cybersecurity and compliance training courses are accountable and measurable, designed to optimize the user education experience while measurably reducing risk and providing a high ROI.

## Key Features

### » Easy 5-step setup wizard and LMS

Webroot Security Awareness Training is integrated into the Webroot Global Site Manager console and contains a complete learning management system (LMS), so running courses and programs is as easy as possible. The built-in five-step wizard increases the ease and reduces the man-time costs of running education programs. Plus, the automated campaign scheduler means you can organize ongoing user education programs and reports in minutes.

### » A fully featured phishing simulator

Phishing is the primary way users are currently socially engineered. Our ever-expanding and topical phishing template library is regionalized for effectiveness and relevance, while allowing realistic engagement with end users in real-world phishing scenarios. Launching realistic phishing attack simulations lets you accurately monitor actual user responses and apply appropriate awareness programs as needed.

### » Engaging and interactive training courses

Offering engaging, easily-consumed, interactive courses increases end users' attentiveness, as well as the overall effectiveness of cybersecurity education programs. All of Webroot's high-quality cybersecurity courses can be sent on a scheduled or ad hoc basis directly to end users, who can access and launch them in one click from any browser on their computer or mobile device.

### » Trackable, customizable training campaigns

Measuring individual and overall success is key so you can direct relevant awareness training of different levels and types to users who need them. The built-in LMS keeps track of user participation, making all education accountable and measurable.

### » Campaign and contact management

Our training campaign management wizard, contact manager, training email templates, comprehensive course library, and reporting center lets you schedule and assign training efficiently and get results. You can import contacts via CSV or web-based form; use tags to group contacts by location, department, business unit, etc.; and send training and phishing by individual or group.

## About Webroot

Webroot was the first to harness the cloud and artificial intelligence to protect businesses and individuals against cyber threats. We provide the number one security solution for managed service providers and small businesses, who rely on Webroot for endpoint protection, network protection, and security awareness training. Webroot BrightCloud® Threat Intelligence Services are used by market leading companies like Cisco, F5 Networks, Citrix, Aruba, Palo Alto Networks, A10 Networks, and more. Leveraging the power of machine learning to protect millions of businesses and individuals, Webroot secures the connected world. Headquartered in Colorado, Webroot operates globally across North America, Europe, and Asia. Discover Smarter Cybersecurity® solutions at [webroot.com](http://webroot.com).

### World Headquarters

385 Interlocken Crescent  
Suite 800  
Broomfield, Colorado 80021 USA  
+1 800 772 9383

### Webroot EMEA

6th floor, Block A  
1 George's Quay Plaza  
George's Quay, Dublin 2, Ireland  
+44 (0) 870 1417 070

### Webroot APAC

Suite 1402, Level 14, Tower A  
821 Pacific Highway  
Chatswood, NSW 2067, Australia
